

## **FAIRFIELD HARBOUR YACHT CLUB JULY EDUCATION REPORT**

Your Education Committee is in Summer Break mode.

We had a very good finish to our first-half schedule, with Bill Neilson's presentation of Rules of the Road – a Review on June 18th. Bill did an excellent job of reminding us of what we need to know and should know about operating our boats in a safe (and legal) fashion as we move up and down our waters, be it from here to Persimmon's or from here to New Jersey or Florida.

Our next program scheduled is on September ninth. Kathie King, our Fleet Surgeon and wife of our Vice Commodore, will be presenting another program we all need to know more about, on Medical Preparation For Cruising and Use of First Aid Kits. She will be telling you all the things you hope you never have to know about how to deal with medical issues while you're on the water. That will be on Friday, September ninth, the day after our September membership meeting, 0900, at the Community Center.

Also, Ruthie Levin is open to providing another class on navigation for those who missed out on her class this Spring. She will schedule the class around your calendar. Call her/see her for more information and to work out a convenient time for you take advantage of this opportunity.
